

Datasheet

CESCO Petro Tape

CESCO Petro Tape is a conformable, cold-applied fabric tape for the corrosion protection of pipes and cables. It is used for the corrosion protection of buried or exposed pipes, valves, fittings and cables

CESCO Petro Tape

- For Corrosion protection on buried or exposed metals/pipes/cables
- Available in 30mm and 50mm
- 10M roll length

Code	EAT30	EAT50
Size	30mm	50mm

- Tensile Strength—200N/50mm
- Elongation at Break—10%
- Breakdown Voltage—16kV
- Thickness—1.15mm
- Weight—1.44kg/m²
- Service Temperature -20° to +55°C
- Application Temperature -5° to +45°C

Made from a proprietary blend of:

- Paraffinic Wax
- Solvent refined oils
- Inert fillers

All impregnated onto a fabric tape
